DO/IMS 86-184

22 April 1986

MEMORANDUM FOR: Director of Information Technology

25X1 FROM:

Chief, Information Management Staff

SUBJECT: Requirement for Direct Delivery of Traffic to the CTC

1. The DO has a critical requirement to deliver high precedence messages to the Counter Terrorism Center (CTC) without delay. Currently, there is no capability to route incoming traffic directly to the CTC. CTC personnel must walk to the DDO Duty Office on another floor to receive early copies of high precedence traffic.

2. To satisfy the CTC requirement for immediate delivery of high precedence traffic please install a CDS terminal in 6F21. I understand that members of your staff are currently examining alternative ways of doing this, and their efforts are very much appreciated. However, in view of the fact that the installation of cable from CDS to the CTC could be a rather long lead time item, it would seem prudent to initiate this activity right away, as it will be required regardless of the particular technical approach ultimately selected by your staff.
